Garden Supplies - Fertilizers - Insect Destroyers and Fungicides

ENGLISH DIGGING FORKS

The tines are square, more slender and sharper than those of the regular steel spading forks, and therefore, enter the ground more easily and are not so apt to be bent. Price \$2.00.

SPEEDY CULTIVATOR

This is a great labor-saving device. The tines are correctly spaced to thoroughly break up the ground as they are drawn through the soil. On account of its small size, closely planted beds can be kept free of weeds by working between individual plants as well as the rows. Areas inaccessible to any other tool, such as under shrubbery, hedges and low growing evergreens are easily cared for with a Speedy Cultivator. Price \$1.00.

LEVEL HEAD STEEL GARDEN RAKES

This is a popular style because the teeth are strong enough to pulverize the soil, and by turning the rake over, the straight level head can be used for smoothing the beds. Price \$1.25.

ROUND BOW STEEL GARDEN RAKES

The bows, head and teeth are forged from one solid piece of bar steel. This style is one of the most popular rakes for general purposes. The price is \$1.25.

LAWN COMB RAKES

The fingers are made of flat spring steel which adapt themselves to every irregularity of the ground and sweeps it clean of all leaves and twigs without injury to the grass, as the ends are rounded.

14" DRAIN SPADE

A very useful tool in transplanting shrub and long-rooted perennials such as bleeding heart, Oriental poppy and peony. Ladies' Spade, \$1.65. Light Nursery Spade, \$1.65.

ALL-METAL GARDEN MARKERS

The greatest pleasure from work with flowers can only be achieved when named varieties can be permanently marked. At last we offer markers popularly priced, all holders and tabs made of non-rusting, non-corrosive metals. All wire standards for B-201, B-202, B-210 and B-211 are approximately eighteen inches in length.

The wires used in making B-206 and B-207 are made of non-rusting, non-corrosive zinc, and will not set up chemical action detrimental to the tree, shrub, or flower to which they are attached.

All metals used in the manufacture of these markers weather a dull gray which blends into the background of your garden. The marking fluid produces a jet black, easy-to-read marking, which will last indefinitely when exposed to all weather conditions. Be sure to wipe metal clean and apply fluid as instructed.
